Invitation | Automatik2010

August 2010

Dear ETG Member,

We would like to invite you to visit the Automatik2010.
The conference exhibition and forum takes place
September 7-9, 2010, in Brøndbyhallen, Denmark.

The ETG will be present at the Beckhoff Booth B1058.

There will be also a free EtherCAT Introduction Presentation on Wednesday, 8th September at 14.30 in meeting room “Morten Frost” at Idrættenshus covering fundamentals of EtherCAT technology, competitive advantages through EtherCAT, implementation aspects and application examples.

Don’t miss this excellent opportunity to discuss your application and inform yourself about the EtherCAT technology.

Please also ask for an appointment, if you are interested!

EtherCAT (Ethernet for Control Automation Technology) is the high performance industrial communication protocol for deterministic Ethernet. EtherCAT sets new standards for real-time performance, simple configuration and topology flexibility. The EtherCAT Technology Group (ETG) ensures to support, promote and advance this open standard. The ETG is the world's largest Industrial Ethernet organization with more than 1400 members.

More Information about the tradeshow can be found here:
http://www.automatik10.dk

Please find detailed information about EtherCAT technology and the ETG here:
